

FinPro Deployment Cost Breakdown

Sambu Leonard (Llakterian)

January 8, 2026

Overview

This document outlines the estimated initial costs required to deploy the FinPro platform to the production environment, covering hosting, blockchain deployment fees, and operational buffers.

Cost Breakdown

Item	Description	Estimated Cost (USD)
Vercel Pro Plan	Monthly subscription for hosting	\$20.00
TON Deployment	Smart contract deployment on TON	≈ \$12.00
Base L2 Deployment	Smart contract deployment on Base (L2)	≈ \$22.00
Deployer Wallet Buffer	0.01 ETH for gas & fluctuations	≈ \$25.00
Total Estimate		≈ \$79.00

Notes

- **Vercel Pro Plan:** Recurring monthly cost.
- **Deployer Wallet Buffer:** This amount (0.01 ETH) is reserved to cover gas fee fluctuations and initial transaction testing during the deployment process.
- **Exchange Rates:** Crypto asset values (ETH, TON) are estimates and subject to market volatility.
